FUTURE THINKING, NOW

AI COMPASS: STAFFING INDUSTRY POWER SESSION 2026

AI is radically reshaping how staffing businesses source, screen, place and retain talent. This practical session shows you exactly how to plug the latest AI capabilities into real staffing workflows in the South African context.

Latest AI shifts in staffing (2026)
- Agentic/assistant-style AI for recruiters
- Skills-first, data-driven hiring and AI-matching
- Risk, bias, POPIA and ethical guardrails in recruitment AI

Tools, platforms and SaaS you can use now
- AI-enhanced ATS/CRM, sourcing and job ad tools
- Screening, interview, chatbot and automation platforms
- How to decide what fits TES, permanent, functional outsourcing and talent cloud models

Process mapping, prompting and automation
- Mapping a TES / perm placement workflow for AI
- Prompt patterns for job specs, sourcing, screening, client reports
- Where to insert automation (intake, shortlisting, onboarding, redeployment)

Hands-on, practical application
- Build a mini "AI recruiting assistant" workflow in-session
- Leave with prompt templates you can plug into your own tools the next day

WHO SHOULD ATTEND
- Owners / executives of staffing and TES businesses
- HR and Talent Acquisition leaders
- Operations managers in functional outsourcing and talent cloud environments
- HR / ER / labour law professionals supporting staffing operations

OUTCOMES
By the end of this session you will:
- Understand where AI is *really* adding value in staffing in 2026
- Have a clear map of your own recruitment process and AI "insertion points"
- Walk away with reusable prompts and workflow ideas tailored to TES, permanent, outsourcing and talent clouds
- Know which categories of tools to explore next (without getting lost in vendor noise)

DATE: 9 April 2026

PLATFORM: Zoom

TIME: 09H00 - 12H00

PRICE: R 950 excl. VAT

All workshops are offered as customised in-house training that can be presented virtually or on-site. Contact us for more information.
